Selectable LED Area Light

MOUNTING GUIDES

S: SLIP FITTER MOUNTING

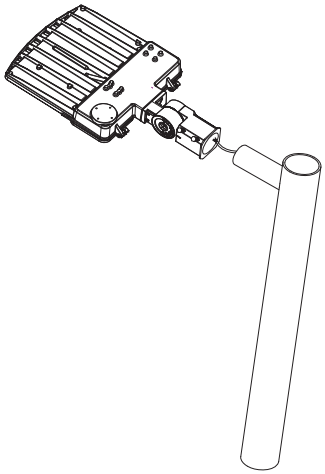

Dimensions of the slip fitter

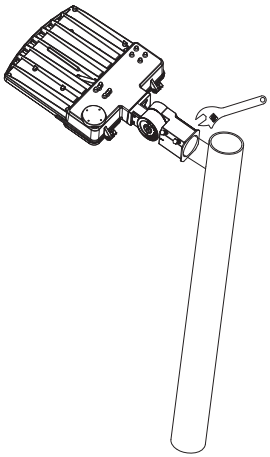

Step 1

Connect the AC wire, and then insert the arm of the slip fitter to the pole.

Step 2

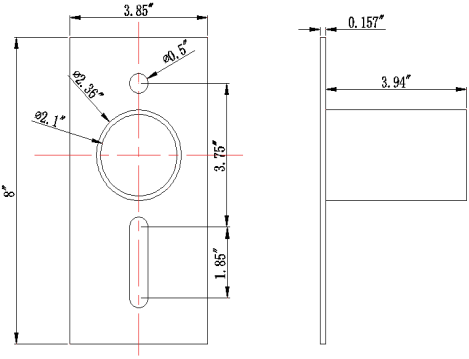

Tighten the screws on the side of the arm and then power on.

T: TRUNNION MOUNTING

Dimensions of the trunnion

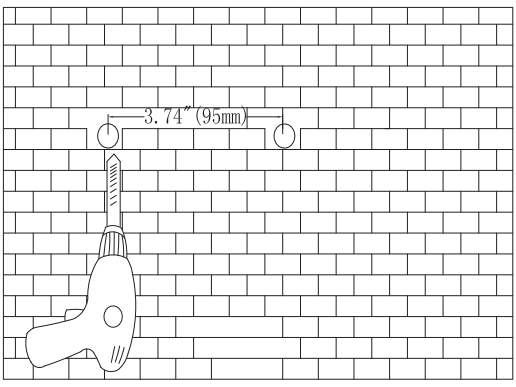

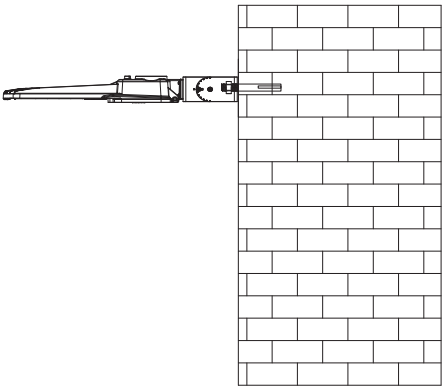

Step 1

Drill two holes on the wall corresponding to the holes on the trunnion, and knock expansion screws into the holes.

Step 2

Use the nuts to fix the fixture to the wall aiming at the expansion screws, and adjust angle of the bracket and tighten the small screw on the side, then connect the AC wire.

Arm with Photocell Installation

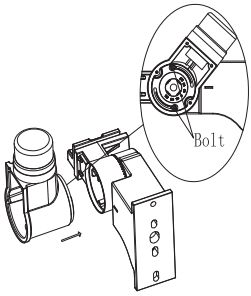

Step 1

As shown in the picture, open the connection box cover of the steering arm.

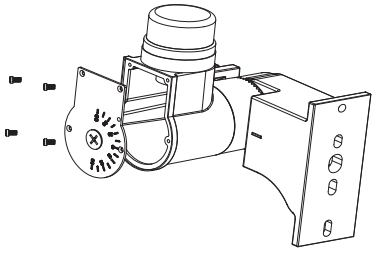

Step 2

As shown in the picture, the holes of the photocell in the junction box match with the screws of the mounting arm, then rotation and adjust the direction of the photocell, to ensure that the photocell is perpendicular to the ground.

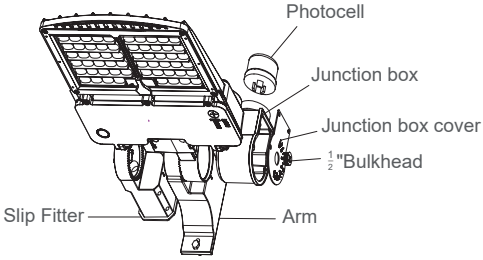

Step 3

Connect the photocell base with AC line and check it correctly.As the picture is shown, lock the junction box cover and turn on the electricity.

VI QUALITY ASSURANCE

- Quality assurance is based on proper storage, transportation, installation, using and maintenance
- Damages caused by man-made mistake or improper use are not covered by the warranty
- Risk of electrical shock!
- During the warranty period, the manufacturer will provide appropriate support and repair service according to the actual situation

WARNINGS AND CAUTIONS

- The product must be installed according to the instructions. Installed by a person familiar with the product, production and product hazards.
- Avoid fire and electric shock. When install the lighting fixtures, you need to understand the electrical characteri stics. If you are not sure, do not attempt to install. Please contact the electrician.
- Understand the structural features and dimensions of lighting before installation
- Do not drill holes or change internal lines when install
