

Installing Photo Eye to 3" Lamp Post

Insert Photo Control into Post Adapter. Make sure wires are facing upwards for wiring fixture.

Install Photo Control into the 11/16" Dia. hole. Be sure foam gasket on photo control sits inside of post. Secure with mounting plastic nut.

Secure Photo Eye Kit to pole using 8mm nut driver and power drill (not included) with self tapping screws (included).

Self tapping screws are designed to tap into existing pole.

DO NOT OVERTIGHTEN.

Wiring Instructions

TURN OFF POWER

USE WIRE CONNECTORS (included)

Connect **BLACK** photo control wire to **BLACK** power supply wire.
 Connect **RED** photo control wire to **BLACK** light fixture wire.
